Today’s News Special

Photographer: William Harper.

Jean-Paul Sartre is again with the Communist Parties

So in fact then a woman is photographic the road and its upturned car in the previous image which now shifts to photographic Sartre who is in his ancient Egypt room and with a lot of books.

I mean then as a joke goes in our old ways of Polish and Soviet jokes mixed to Sirohi working away and publishing daily again hopefully.

That we are so educated, and so well read.

So with that type of intellectual formation, what care about the problems of living feverishly or any such issue.

I mean then to argue “a whole production process” as Marx means is

Editorial Piece on Radios

And so we mean to connect that piece on production process and Grundrisse earlier and now Sartre on how radio really works and how it is done each day by him with the French partisans of his works

In fact then Sartre writes about radios a lot, he means the best radio is one which is a free radio living culture. He was trying to argue it is about Aegyptology these days with Sirohi. He is just musical now.

Now I mean that the production process and free movements around them and the leader Sirohi is then working away on this news piece he is pinning.

I mean then to be new but also old. Sartre is older and newer at once. He sees only utopianism in India, and perhaps other countries where we do the daily life of utopia together.

Try being so without issue.

From Grundrisse and Activities to our own perception

Photographer: William Harper.

And so we mean Solidarity is celebrating its news pieces.

We are all so Communist it is so happy and beautiful

I mean come on, Trotsky is arguing, just understand yourself Sirohi.

Know each day that we are this connected and this well read.

Know each day we won.
